Well Baby Clinic
優越兒童保健中心

About Us 關於我們

The Well Baby Clinic is established as part of the bigger picture to center pediatric service in HKAH-TW around a “Medical Home” concept. The WBC will provide continuing support for couples who have their babies delivered in HKAH-TW so as to broaden a young family’s capacity for better functioning. By providing basic and optional vaccines to infants in regular intervals and make use of each visit as chance to provide preventive health services such as growth monitoring, developmental surveillance, dietary advice and positive parenting skills.

When a child is suspected to have a growth or developmental problem, the long waiting time to be evaluated by pediatric specialist or subspecialist can be most stressing for young parents.
